

# Data Centre Assessment & Migration

## Scenario

You have outgrown your current data centre and it makes good business sense to move your IT infrastructure to a commercial data centre. Where do you start? At OpsCentre, we recognise 3 keys to a successful data centre migration

1. Determining an in-depth understanding and definition of your requirements;
2. Creating an RFI/RFP and undertaking a competitive bidding process, and
3. Accessing the latest market intelligence on data centre services and providers.

OpsCentre can assist your organisation in the development and execution of a best-in-class Data Centre RFP process.

## Data Centre Expertise & Market Knowledge

OpsCentre provides requirements analysis, RFI/RFP development, technical expertise and market advice for your data centre implementation, relocation, consolidation, and collocation services.

We have a broad base of consulting, technical, operational and project management expertise in data centre planning, site selection, physical security, data centre infrastructure cost estimation, business case development, contract negotiations, implementation and consolidation.

Our approach is balanced across the goals of the business, cost effectiveness, and technical excellence in support of stability, security, and value to your organisation.

## Services

**Data Centre Strategy.** We assist you to clarify requirements, identifying data Centre Tier level targets, and creation of data Centre plan and roadmap aligned with the strategic goals of the business.

**Data Centre Selection & Planning**  
In the Selection and Planning Phase we assess buy/build options, author RFP's, and identify collocation, engineering and construction partners.

**Data Centre Transition Project Management.** We develop the steps necessary to implement the Data Centre plan including contract negotiation, project management, relocation of data processing services, and consolidation of IT assets.
