Advanced IT Disaster Recovery Planning Course

KEY TOPICS

- **Building the Business Case for IT DR**
- **Obtaining Management buy-in and approval for IT DR**
- **Development of an IT DR Budget**
- **DR Policy & Governance Considerations**
- **DR Plan Ownership and Accountability**
- **Developing an IT DR Risk Profile**
- **Advanced IT DR Implementation Considerations**
- **Case studies**

This course is aimed at the person who has a good working knowledge of IT Disaster Recovery practices while wishing to further their knowledge of advanced DR Considerations and develop advanced skills.

The course covers how to obtain management buy-in, approval and support, how to develop a disaster recovery budget, an IT DR Policy and governance framework and assigning and managing IT DR plan ownership.

The course then looks at developing an advanced risk profile for IT DR infrastructure and systems, how to align your Disaster Recovery Plan to business requirements, and finally advanced IT DR implementation considerations.

Delegates will undertake a "Cost of Downtime" exercise during the course.

Case studies are provided showing how several organisations have implemented advanced IT DR solutions.

YOUR COURSE PRESENTER

The Advanced IT Disaster Recovery Planning Course will be presented by one of:

Rod Crowder, Managing Director, Ops Centre

Rod is founder and managing director of OpsCentre, a boutique managed services and consultancy provider of Business Continuity and Disaster Recovery services.

Over the last 12 years, Rod has assisted numerous public and private sector organisations to plan and manage IT Disaster Recovery projects, in both a consultancy and hands-on operational capacity.

Rod's management qualifications in the IT Infrastructure Library (ITIL) and Project Management lead to his strong understanding of Service Level and Availability Management and how these disciplines are underpinned by good-practice IT DR solutions.

Darrin Gay, Principal Consultant, Ops Centre

Over the last 10 years, Darrin has assisted numerous public and private sector organisations to plan and manage IT Disaster Recovery projects, in both a consultancy and at a hands-on operational capacity.

Darrin has a thorough understanding of client business requirements underpinned by good-practice IT DR solutions that has delivered the necessary mix of technical and procedural solutions for the projects that he has managed.
