

Testing IT Disaster Recovery Plans

WORKSHOP

KEY TOPICS

Crisis Management, Business Continuity & IT Disaster Recovery defined

Types of Incidents & Risks

Types of IT DR Test

IT DR Infrastructure & Technology Considerations

IT DR Plan Structure

IT DR Test Planning & Logistics

Executing the Test

Test Reporting/Outcomes

Plan Maintenance

THIS WORKSHOP covers the fundamentals of planning for and executing IT Disaster Recovery tests. Delegates will gain an understanding of how IT Disaster Recovery fits into the overall Crisis and Business Continuity Management process and how the IT DR plan can be tested, either independently, or in conjunction with, Business Continuity testing. All delegates will be given an opportunity to plan and run a hypothetical exercise, based on a sample case study, and using DR scenarios and test templates provided during the course.

YOUR WORKSHOP PRESENTER

Rod Crowder, Director, OpsCentre

Rod is founder and managing director of OpsCentre, a boutique managed services and consultancy provider of Business Continuity and Disaster Recovery services. Over the last 12 years, Rod has assisted numerous public and private sector organisations to plan and manage their IT DR tests, in both a consultancy and hands-on operational capacity. Rod's management qualifications in the IT Infrastructure Library (ITIL) and Project Management lead to his strong understanding of Service Level and Availability Management and how these disciplines are underpinned by good-practice IT DR solutions.
